

fact sheet

flashfoliant

description

A leave-on, flash-foaming chemical exfoliant that helps clear and prevent breakouts while brightening skin.

key benefits

- **Helps wipe out** existing and future breakouts.
- **Provides** a seemingly instant glow.
- **Brightens** skin and helps even skin tone.

key ingredients

- **Salicylic Acid:** a Beta Hydroxy Acid that stimulates natural exfoliation, helping to clear impacted follicles and minimize breakout formation.
- **Grape Extract:** a potent source of AHAs like Citric, Lactic, Malic, and Tartaric acids, exfoliates dead skin cells to help even skin tone.
- **Tangerine Peel Extract:** brightens dull skin.

how to use it

Invert bottle and squeeze to dispense foam. Apply once daily to cleansed face and neck. Allow to absorb.

frequently asked questions

Can my clients use FlashFoliant daily?

Yes. It was designed to be easily added to your client's everyday regimen. The no-rinse option is particularly convenient!

Should my client apply FlashFoliant in the a.m or p.m.?

FlashFoliant may be used day or night. Please advise your clients to use sunscreen regardless of when they use FlashFoliant. Exfoliation can leave their skin more vulnerable to sun damage, which can increase the visibility of their breakouts.

Where does FlashFoliant go in my client's regimen?

FlashFoliant should be applied after cleansing, before moisturizing.

Can any skin type use FlashFoliant?

Yes. FlashFoliant was formulated with oily or breakout-prone skin in mind but anyone can use it to achieve glowing skin. Please note that this product contains Salicylic Acid, which may be drying to some skin types. Clients with drier skin can still use FlashFoliant, just not as often, and should always follow with moisturizer, like Clear Start Skin Soothing Hydrating Lotion.

What is the appropriate age range for Clear Start?

Clear Start is ideal for clients in their teens and early 20s.

What is the difference between Clear Start and Active Clearing?

Clear Start is formulated for younger skin, which is more likely to experience rampant breakouts due to excess oil. Active Clearing is formulated for more mature skin, which is likely to experience recurring hormonal breakouts, slower cell turnover, and post-inflammatory hyperpigmentation.

What types of breakouts will Clear Start treat?

Clear Start can treat all types of breakouts, but topical treatment for higher-grade forms of acne may need to be supplemented by medical advice.

How soon will my client see results?

Every client is different. Advise your client to be patient and dedicated to their regimen, and to check back in with you if they are not noticing results.

Is FlashFoliant vegan?

Yes, all Clear Start products are vegan, gluten-free and cruelty-free. They are also formulated without artificial fragrances and colors.
