exfoliate
- **algae omega-3 blend**
helps reduce the triggers that lead to post-inflammatory hyperpigmentation
- **tranexamic acid + niacinamide**
brightens + helps even skin tone
- **turmeric butter blend**
leaves skin feeling smoother + softer

what it is

At-home peel helps visibly lift surface hyperpigmentation – including UV-induced dark spots, post-blemish marks, and melasma.

why your clients need it

A fast-acting solution for a range of skin tones and types experiencing stubborn hyperpigmentation and post-inflammatory hyperpigmentation.

application

Apply a thin, even layer. Leave on for 15-20 minutes, then rinse. Begin by using daily for 4-5 days, then use 2-3 times per week. For an extra boost, leave on skin up to 30 minutes.
